## EXPLANATION OF GROUP SYMBOLS

### GROUPS OF TYPES 11, 12, 13, and 14:

A-Wrappers  
B-Leaf and smoking leaf  
C-Cutters  
X-Lugs and primings  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 21, 22, 23, and 24:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 31:

A-Wrappers  
B-Bright leaf, red leaf, and tips  
C-Lugs and cutters  
X-Trash and flyings  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 32:

B-Heavy leaf or dull crop  
C-Thin leaf or bright crop  
X-Seconds and ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 35, 36, and 37:

A-Wrappers  
B-Heavy leaf  
C-Thin leaf  
X-Lugs  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 41:

B-Binders or tops  
C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 42, 43, and 44:

C-Fillers (farm wrappers)  
X-Stemming grades  
Y-Farm fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 46:

C-Superior  
X-Inferior  
Y-Defectuoso  
S-Scrap (Picadura)  
N-Nondescript

### GROUPS OF TYPES 51, 52, and 53:

A-Wrappers  
B-Binders, seconds, and brokes  
C-Fillers and short darks  
X-Stemming grades  
Y-Sand-leaf fillers or ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 54 and 55:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Sand-leaf fillers or bottom leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPE 56:

B-Binders  
C-Fillers  
X-Stemming grades  
Y-Ground leaves  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 61 and 62:

A-Wrappers  
B-Stout wrappers and binders  
C-Fillers or tips  
X-Filler brokes  
S-Scrap  
N-Nondescript

### GROUPS OF TYPES 81, 82, and 83:

A-Wrappers  
C-Fillers  
S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Total Stocks Show Small Increase Over  
Last October 1

The farm-sales-weight equivalent of stocks of all types <sup>1/</sup> of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico on October 1, 1946 <sup>2/</sup> totaled 2,997 million pounds as compared with 2,928 million pounds on October 1 last year. During the third quarter, July 1, 1946 to October 1, 1946, around 655 million pounds entered stocks through sales and deliveries. These additions consisted mostly of flue-cured, but included some Maryland and cigar-leaf. In comparison, around 700 million pounds were marketed during the third quarter last year. Total holdings of all types increased over July 1, 1946 by 144 million pounds.

For the southern types, Burley stocks were 12 percent larger than on October 1 last year, flue-cured about 1 percent greater, and dark air-cured holdings were at the same level. In contrast, Fire-cured leaf on hand dropped 20 percent from a year ago, and Maryland stocks were down 23 percent. Of the cigar-leaf types of tobacco, stocks of American-grown filler types, including Puerto Rican, decreased 5.1 percent and shade wrappers 5.6 percent, whereas the volume of binder types was slightly greater than on October 1, 1945.

<sup>1/</sup> Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Figures quoted in comments of reports prior to July 1, 1946, were on a reported weight basis. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

<sup>2/</sup> The general instructions for filing the tobacco stocks' reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

### CIGARETTE-LEAF STOCKS

Large Stocks of Burley;

Flue-cured Slightly Greater Than a Year Ago; Maryland Down Sharply

Stocks of flue-cured tobacco on October 1, 1946, converted to the farm-sales-weight equivalent, were 1,495 million pounds - only 12.5 million pounds above October 1, 1945. The flue-cured auction markets opened in July and around 640 million pounds had been marketed by the end of the quarter. Stocks were increased 348 million pounds over July 1, 1946.

Burley stocks were 853 million pounds compared with 759 million on October 1, 1945. This is the greatest carry-over of Burley tobacco on record - due mainly to the large crops of 1944 and 1945 which exceeded disappearance. Disappearance of Burley during the past marketing year, October 1, 1945, to October 1, 1946, totaled 484 million pounds - the same as for the corresponding period a year earlier. Of this total disappearance, 35.3 million pounds were exported as against 9.4 million the previous marketing year.

Maryland holdings, Type 32, were almost 12 million pounds less than a year ago, which can be attributed mostly to the small crop in 1945 and the continued high rate of consumption. Stocks on October 1, 1946, totaled 40.3 million pounds. Around 9.4 million pounds of the 1945 crop were marketed during the third quarter this year and stocks were up 2.6 million pounds over the July 1, 1946 figure.

Stocks of foreign-grown cigarette leaf and smoking tobacco (Turkish and other) totaled 86.9 million pounds compared with 95.1 million pounds on July 1, 1946.

### DARK TOBACCO STOCKS

Fire-cured Stocks at Low Level;

Dark Air-cured Unchanged From Last October 1.

Fire-cured leaf stocks dropped to 104.9 million pounds for the smallest October holdings on record, and showed a decrease of 26.9 million from October 1, 1945, which was the previous low figure. Large exports, following curtailment of shipments during the war years, and lower production were the chief factors resulting in the smaller inventory of fire-cured leaf. Disappearance of fire-cured tobacco during the marketing year, October 1, 1945, to October 1, 1946, was 84 million pounds compared with 106.8 million a year earlier. Exports during the past marketing year were 47.6 million pounds compared with 63.9 million for the 12 months ending October 1, 1945. Fire-cured holdings according to types were as follows; Virginia 17.6 million pounds, Eastern District of Tennessee and Kentucky 68.1 million, Western District of Kentucky and Tennessee 19.2 million, and Henderson Stemming 94 thousand pounds. Dealers and manufacturers owned 60.4 million pounds of dark air-cured leaf, the same as that held on October 1, 1945. One Sucker stocks amounted to 32.8 million pounds, Green River 24.8 million, and Virginia sun-cured 2.8 million. Disappearance of the dark air-cured types during the marketing year ending October 1, 1946, totaled 43.5 million pounds compared with 41.8 million for the previous 12-month period. Around 13.1 million pounds were exported during the past marketing year, whereas shipments abroad were 6.3 million pounds for the year ending October 1, 1945.

CIGAR LEAF STOCKS

Filler and Shade Wrapper Stocks Down;  
Some Binder Types Higher, Others Lower.

Stocks of the domestic cigar leaf, including holdings in Puerto Rico, on October 1, 1946, were 327 million pounds on a farm-sales weight basis. Foreign-grown cigar leaf stocks on an unstemmed-equivalent basis were 26.1 million pounds. American-grown cigar-filler stocks, which include Puerto Rican, amounted to 207 million pounds compared with 218 million on October 1, 1945. Stocks of Pennsylvania Seedleaf were down 6.7 million pounds from a year ago, the Ohio types decreased 7.4 million, while Puerto Rican was up 3 million. Pennsylvania Seedleaf stocks totaled 102 million pounds; the Ohio filler types 26.7 million pounds; and Puerto Rican 78.3 million, of which 41.6 million pounds were in the United States and 36.7 million held on the Island. Disappearance of Pennsylvania Seedleaf for the marketing year, October 1, 1945, to October 1, 1946, amounted to 52.6 million pounds and of the Ohio types 11.9 million pounds, -- slightly greater for both types than during the corresponding period a year earlier.

Cigar binder leaf stocks, some of which are used for cigar wrappers, amounted to 103.6 million pounds which is a small increase over a year ago. Southern Wisconsin leaf holdings increased 6.9 million over October 1, 1945, whereas stocks of Connecticut Havana Seed, New York and Pennsylvania Havana Seed and Northern Wisconsin types dropped. Stocks of the separate binder types on October 1, 1946, were 24.3 million pounds of Type 51, 16 million of Type 52, 2 million of Type 53, 34.4 million of Type 54, 26.6 million of Type 55, and 0.3 million of Type 56. Disappearance of the binder types during the marketing year just ended totaled 60.9 million pounds compared with 63.2 million in the corresponding period a year earlier.

Stocks of shade-grown wrapper were 16.7 million pounds, a decrease of 1 million pounds from October 1, 1945. Connecticut shade holdings totaled 10.4 million and Georgia and Florida shade 6.3 million. The bulk of the 1946 crop of Type 62 and some of the Type 61 crop entered stocks during the third quarter and total holdings of shade leaf increased 3.1 million pounds over July 1, 1946.

Foreign-grown cigar leaf stocks consisted of 24.7 million pounds of Cuban (Havana) leaf; 1.2 million of Sumatra and Java, not including that stored in the foreign trade zone; 89 thousand pounds of Philippine Islands (Manila); and 128 thousand pounds of Other Foreign-grown cigar leaf.

Stocks of Miscellaneous Domestic types on October 1, 1946, were 2.9 million pounds. Eastern Ohio amounted to 71 thousand pounds, Perique 796 thousand pounds, and Other Miscellaneous Domestic 2 million pounds.

1.—Average percentage of weight remaining after handling, sweating, drying and stemming for all types of tobacco and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent

<sup>1/</sup> For factors used in converting weights, see table 1. October 1, 1946 figures subject to revision.

<sup>2/</sup> For explanation of stocks included in this classification, see footnote 6 on page 17.

<sup>3/</sup> Foreign-grown leaf is converted to an unstemmed equivalent basis only.

<sup>4/</sup> Does not include several million pounds of Sumatra and Java leaf stored in the Free Trade Zone.

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ Subject to revision.

3/ October 1 estimate, U. S. Crop Reporting Board.

4/ Crop year changed from October 1 to July 1 basis because part of new crop enters stocks before October 1.

|-------|-----------|---------|-----------|------------|----------|------------|

1/ Subject to revision.

2/ See Supplementary Burley report on page 18.

3/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.

4/ Includes Puerto Rican on the Island, Type 46.

5/ Type 84.-Other foreign-grown all shown in the C group.

6/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

7/ Does not include several million pounds of Sumatra and Java leaf stored in the Free Trade Zone.

\* Revisions in July 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis. Figures are as reported to date; no revisions of this table will be made.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown in the manufacturers' column also include stocks purchased under agreement with the Commodity Credit Corporation which are earmarked for export and are not actually available to manufacturers. These stocks are reported as approximately 9.0 million pounds. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 6 on page 17.

5/ Does not include several million pounds of Sumatra and Java leaf stored in the Free Trade Zone.

Table 7.-Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, October 1, 1946 compared with other quarters 1/

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1945, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ For explanation of stocks included in this classification see footnote 6 on page 17.

4/ Does not include several million pounds of Sumatra and Java leaf stored in the Free Trade Zone.
